MEETING SCRIPT

Facts select the moves; read the room, never the record · Brian Moynihan, Bank of America · Prepared Oct 14, 2026

1. OPEN

- **Hook:** *On Wednesday's call you said about 130 AI projects each carry a payback [4]. May I take two minutes on a payback case for advisor preparation?*
- **Credibility:** Talyx builds AI meeting-prep tools for executive teams [14].
- **Insight:** Erica drew nearly 700 million interactions in 2025 [19]; advisor payback comes from time saved per meeting.
- **Rule:** let him finish; echo his words before the next question.

2. QUESTION ORDER

- **Story:** Which of your 130 AI projects paid back fastest? [4]
- **Process:** You judge AI on a business case [6]; who signs it off?
- **Gate:** Dean Athanasia and Jim DeMare oversee eight business lines [5]; who else weighs in?
- **History:** Erica passed 3.2 billion interactions [7]; what did rollout teach?
- **Commitment:** You expect AI to matter more from 2026 [3]; who owns advisor preparation?

3. OBJECTIONS: NAME IT, THEN ANSWER

- **"We build our own AI.":** *Erica reached 3.2 billion interactions that way [7]. I ask only whether advisor preparation passes your payback test.*
- **"AI is inflationary right now.":** *You called it inflationary in the short term [17]; so I'd bring a payback number first.*
- **"Talk to Dean or Jim.":** *Gladly; they oversee eight business lines [5]. Could you introduce me with one sentence on why?*

4. CLOSE

- **Restate:** ask what makes a second meeting an easy yes; say it back in his words.
- **Real deadline:** none found in the record; use the date he gives.
- **The ask:** 30 minutes with Dean Athanasia or Jim DeMare [5] · **Fallback:** 30 minutes with the preparation owner he names.
- **Follow-up:** send the one-page payback case in one business day [14].

5. READ THE ROOM (WATCH, DO NOT ASSUME)

- **Fast, wants the answer:** give the outcome in one sentence, then one number [4].
- **Asks for terms and data:** bring numbers and sources; he cites middle and top income households spending faster [20].
- **Talks about people:** credit his team before you propose anything [15].
- **Big picture, ideas:** link to his view that AI is "a bigger contributor" ahead [3].

6. INFLUENCE, ONE FACT BEHIND EACH

- **Authority:** use the business case he named as his own test [6].
- **Commitment:** he says each project has a payback [4]; agree the bar before you show numbers.

7. IF IT STALLS

- **The move:** ask how Erica's payback was judged and what he would keep for the next tool [7].
- **The move:** ask if the AI cost is offset by more revenue or less expense [13].

8. GUARDRAILS

- **Rule:** promise no savings or returns; state only measured results from your own files.
- **Never say:** "Does that make sense?" · "Is this helpful?" · "No pressure" · "You'd know better than me" · "Just checking in"

Next step: send the one-page payback case by Oct 17, 2026 [14].
